

## External opportunities

The below external providers have expressed interest in providing placement opportunities for UQ MD students. These placement opportunities are not organised and specifically endorsed by the Faculty but may be of interest to you. Details can be found below for you to investigate further.

### UQ Healthy Living (UQHL)

UQ Healthy Living is an over 50's allied health facility that leads the way in harnessing the collective benefits of interprofessional care. The first of its kind, UQHL is a multidisciplinary service promoting longevity and wellbeing, resourced by students, supervised by leading clinicians, and supported by cutting edge technology. This unique synergy delivers affordable, quality care that considers a patients physical, mental, and emotional needs, while educating tomorrow's clinicians in a collaborative, innovative environment.

Interested medical students will not only gain a deep level of understanding of the scope of practice for physiotherapists, psychologists & physiotherapists, but also gain an appreciation for how allied health and primary/specialist care can work collaboratively for improved patient outcomes.

#### *Tasks and Responsibilities*

- contribute to clinical case conferences with allied health clinicians and students
- participate in the daily student interprofessional meeting
- attend intake assessment appointments and co-facilitate certain sections of this assessment under supervision
- contribute to collaborative decision-making to ensure appropriate treatment recommendations for UQHL clients
- observe a range of allied health appointments
- observe a range of allied health programs (My Health for Life, Good Living with Arthritis Denmark, LiveWell group exercise for diabetes)
- assist with cardiac observations (blood pressure SPO2, heart rate) prior to and post cardiac rehabilitation exercise sessions.
