

Annual Medical Student Research Conference 2023

| Welcome | | |
|---------|---|--|
| 5:00 PM | | Registration, poster viewing, refreshments |
| 5:40 PM | Student Convenors | Opening remarks and Acknowledgment of Country |
| | Isaac, Ben, Nikita, Dhaval | |
| 5:50 PM | Guest speaker Professor Nalini Pather BMedSci (Hons), MMedSci (cum laude), GCULT, PhD | Curiosity: the fuel to life's journey |
| 6:00 PM | Kyleigh Kriener | Preserving haptic fidelity: how cadaveric preservation methods affect the biomechanical properties of abdominal wall tissues |
| | Venkata Paruchuri | Application of derivative analysis in right bundle branch block EKGs |
| | Johnson Khor | Mapping integrated electronic medical record (ieMR) data to standardized drug vocabularies using the Observational Medical Outcomes Partnership (OMOP) Common Data Model |
| | Alexander Smith (by video) | Immobilization-associated hypercalcemia in patients with malignancy in the hospital setting: a cohort study |
| | Bryn Rubin (by video) | Relationship between socioeconomic status and depression in patients with multiple sclerosis |
| 6:25 PM | Keynote speaker Associate Professor Helen Benham MBBS(Hons), B.App.Sci(Pod), FRACP, PhD | A clinical, research, governance, and management journey |
| 6:35 PM | Andrew Su | A spatial cellular atlas of stage III colorectal cancers |
| | Raushan Lala | Traffic jams and lifesaving routes: understanding the microcirculation in trauma |
| | Aaron Lerch | The efficacy of post-operative drains for anterior cervical discectomy and fusion: a systematic review and meta-analysis |
| | Matilda Ingram | The barriers to offering non-pharmacological pain management as an initial option for laboring women: A review of the literature |
| | Samuel Walters | Erratic tacrolimus levels at 6-12 months post lung transplant predicts poor outcomes |
| 7:00 PM | Professor Di Eley | Closing remarks and voting for Oral Presentation People's Choice award |
| 7:10 PM | Refreshments and poster viewing | Voting for Poster People's Choice Award |
| 7:45 PM | Awards and Prizes | Presentation of all prizes |

We are grateful for support provided from our generous sponsors.

THE UNIVERSITY OF QUEENSLAND AUSTRALIA Queensland Brain Institute

Thursday 14 September 2023 Translational Research Institute Event Program

Posters displayed at the conference

| Mark Anderson | Chronic disease risk after brain injury: a retrospective review of Australian paediatric patient weight outcomes |
|--|---|
| Kayla Baker | Bridging the gap: Training students to advance an artificial intelligence model as a solution for standardizing nasal cavity landmarks among otolaryngologists |
| Muyun Cao | College with chronic illness- studying coping methods of students with Multiple Sclerosis |
| Richard Dunlop | A systematic review of predictive accuracy via c-statistic of preoperative frailty tests for extended length of stay, post-operative complications, and mortality |
| Jae Ermer | Physical Activity and Well-being in Health Profession Students (PAWHPS) |
| Kirby Fahy | Evolution of antimicrobial resistance in Mycobacterium abscessus isolated from drinking water |
| Shaun Foo | Internet-based programs to support tobacco cessation: a systematic review and meta-analyses of randomised controlled trials |
| Nicole Ann Gunn | Single-cell analysis of the stromal cells of neuroblastoma |
| Yihan Guo | Immune response after rabies pre-exposure prophylaxis and a booster dose in Australian bat carers |
| Ahmed Hafeez-Baig | signal analysis of atrial flutter EKGs using the discrete fourier transform |
| Jessica Hopgood | Factors influencing decisions to becoming a supervisor: a qualitative study of early career general |
| Duide at U. at Tak au | practitioners and rural generalists. |
| Bridget Hunt-Tobey | Differential regulation of FGF23 production and cleavage by iron and EPO in anemic mice |
| Karmveer Kaur | Irreversible visual loss with erenumab in a patient with Behcet's Disease |
| Sungkyung Linda Kim | A scoping review of First Nations data governance approaches applied in research using routinely collected health data and step towards The DIFFERENCE Project |
| A-Jin Jennifer Kim | Systematic review on the resting state fMRI in Parkinson's disease and cognitive impairment |
| Kelly Kossen | Use of the alcohol screening tool, CAGE, as a proxy for sexually transmitted disease in the preventative health encounter |
| Kundanika Lakkadi | Longitudinal impact of physical exercise on patient and medical student wellbeing |
| Amanda Lucas | Effectiveness of telehealth intervention in the management of high weight pregnancy |
| Mallory Luke | Assessing changes in the mechanosensitivity of primary dissociated dorsal root ganglion sensory neurons with the chemotherapeutic drug paclitaxel |
| Aditya Manuel | Determining the efficacy of nutrient supplementation and diet in age-related macular degeneration patient outcomes: a systematic review |
| Serena Mathew | Developing a CD371 targeting CAR T-Cell therapy for acute myeloid leukemia |
| | |
| | Audit of transfusion rates in children with cerebral palsy following pelvic surgery, comparing groups with |
| Levi Matthews | Audit of transfusion rates in children with cerebral palsy following pelvic surgery, comparing groups with and without administration of tranexamic acid #1 |
| Levi Matthews Michael Mullen | and without administration of tranexamic acid #1 Endothelial Glycocalyx Shedding During Shock and Resuscitation is Independent of Tissue Injury in a Porcine |
| | and without administration of tranexamic acid #1 |
| Michael Mullen | and without administration of tranexamic acid #1 Endothelial Glycocalyx Shedding During Shock and Resuscitation is Independent of Tissue Injury in a Porcine Shock Model Queensland Adult Deterioration Detection System observation chart efficiency in detecting patient |
| Michael Mullen Cailem Murray Boyle | and without administration of tranexamic acid #1 Endothelial Glycocalyx Shedding During Shock and Resuscitation is Independent of Tissue Injury in a Porcine Shock Model Queensland Adult Deterioration Detection System observation chart efficiency in detecting patient deterioration: A retrospective case-control study |
