CLEAR for Workforce

We've partnered with CLEAR to make password resets faster, easier, and more secure — while helping protect our organization from unauthorized access.

Why it matters now?

Completing this quick, one-time setup now means you can recover access instantly if you ever get locked out or forget your password. It also helps strengthen Ochsner's overall security by ensuring only authorized employees and vendor can access our systems.

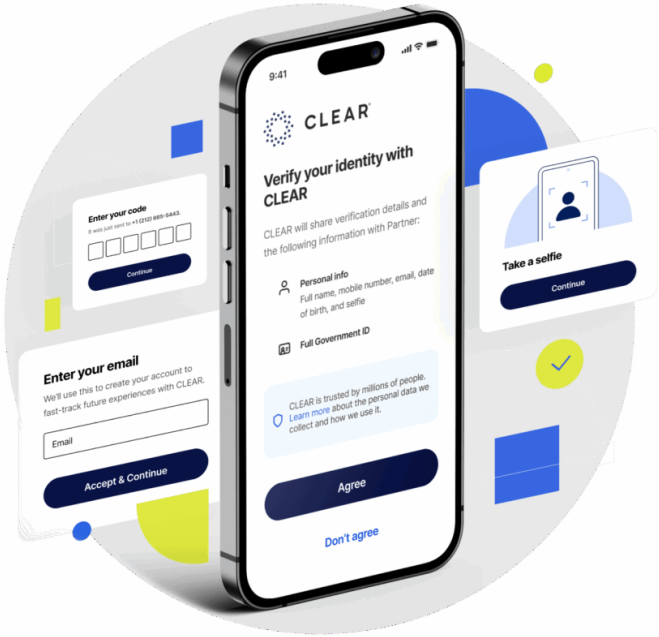

What are the benefits?

- *Quick & simple:* After a one-time set up, all you need to do is snap a selfie.
- *Additional layer of security*: CLEAR verifies YOU, not just the device you're using — to protect our organization, employees, and systems.
- *Privacy-first*: Built to protect your personal information and keep you in control.

How it Works:

- Visit signup link
- CLEAR uses your government-issued ID and selfie to securely confirm your identity.
  - **Used CLEAR before?** Just snap a selfie to verify.
  - **New to CLEAR?** Getting started takes less than 90 seconds. Simply upload your government-issued ID and snap a selfie.

Pro Tip: Enroll with your personal phone number & personal email address for the most seamless experience across CLEAR's ecosystem of partners.
